Explanations	

Our company announced on December 6, 2022, through a special disclosure, that it had begun work on a project to establish a solar power plant (GES) under the unlicensed electricity production regulation, with the aim of meeting its own electricity needs and producing as much energy as it consumes.

Our solar power plant, located in Sandıklı District of Afyon Province, has completed its installation and as of today (August 20, 2024), has received temporary acceptance and commenced electricity production.

With a capacity of 17,000 kWp, this plant is expected to generate approximately 26 million kWh of electricity annually and achieve estimated annual savings of approximately TRY 100,000,000.00, based on current electricity prices.

It is announced to the public with respect.

This statement has been translated into English for informational purposes. In case of a discrepancy between the Turkish and the English versions of this disclosure statement, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
