Explanations	

Our company announced in its special disclosure dated 06.12.2022 that, within the scope of the unlicensed electricity generation regulation, it planned to establish a solar power plant (SPP) to meet its own electricity needs and generate as much energy as it consumes. Additionally, it was stated that following the completion of the Southern Factory investment, an additional solar power plant would be installed on the factory's rooftop.

In our special disclosure dated 20.08.2024, it was reported that the installation of our power plant, located in Sandıklı district of Afyon province with a capacity of 17,000 kWp, had been completed and had commenced electricity production .

As of today (03.03.2025), the commissioning process for the solar power plant, installed on the rooftop of our Southern Factory in Yahşihan district of Kırıkkale province with a capacity of 3,746 kWp, has been completed, and electricity production has begun.

With the completion of these two power plant projects, our Company will both meet its entire energy consumption from renewable sources and achieve a significant cost advantage.

It is announced to the public with respect.
