Announcement Content	
Explanations	

As disclosed to the public in our material event statement dated 24.06.2024, the Board of Directors resolved to renovate the production line of the Northern (former) Plant, which had an annual production capacity of 290 MWp, in line with evolving technologies and increasing demand, and to place orders for a new production line compatible with advanced technologies.

Pursuant to this decision, the new production line of the Northern Plant has been completed and mass production has commenced. As a result of this investment, the plant's production capacity has increased from 290 MWp/year to 500 MWp/year.

With this capacity expansion, the combined total production capacity of our Northern and Southern plants has reached 1,980 MWp/year.

It is announced to the public with respect.

This statement has been translated into English for informational purposes. In case of a discrepancy between the Turkish and the English versions of this disclosure statement, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
